

VERSIGARD

Premium EPDM Roofing Systems

Choose VersiGard

With an industry track record that exceeds 20 years, Versico has demonstrated the superiority of its products and now offers an entirely new standard for long-term performance – its premium VersiGard® EPDM membranes with available total system warranty options up to 30-years.

Versico's VersiGard EPDM membranes provide an economical, high-performance solution for virtually any low-slope roofing application, and with premium 75-mil reinforced and 90-mil non-reinforced options, offer increased strength, durability and long-term performance. VersiGard membranes also provide easy, economical installation, minimal required maintenance and achieve Factory Mutual (FM) approvals and (UL) Underwriter's Laboratories fire ratings, ensuring superior protection for your building. With Versico's innovative Quick-Applied Tape (QAT) Seam Technology, VersiGard EPDM can also offer quick and easy installation along with reduced labor costs.

VERSIGARD 75-MIL REINFORCED EPDM

Ideal for mechanically attached and fully adhered systems, VersiGard 75-mil Reinforced EPDM offers increased strength and durability, as well as enhanced resistance to damage caused by severe weather conditions and heavy foot traffic.

- Enhanced long-term protection and durability with a 75-mil thickness
- Increased resistance to punctures
- Ideal for roofs with heavy construction/maintenance traffic

VERSIGARD EPDM WITH QUICK-APPLIED TAPE SEAM TECHNOLOGY

One of the most critical portions of a VersiGard EPDM installation can be made easier and more efficient with Quick-Applied Tape (QAT) Seam Technology, which factory-applies the Seam Tape to the membrane, greatly reducing the time required for completing seams and minimizing labor costs.

VersiGard EPDM with QAT provides:

- Increased seam strength
- Improved seaming productivity by nearly 75%
- Reduced labor costs
- Factory-controlled consistency that provides a professional finish to any roofing system

Premium EPDM Roofing Systems

VERSIGARD 90-MIL NON-REINFORCED EPDM

With two times the protection of a 45-mil membrane, VersiGard 90-mil non-reinforced EPDM provides enhanced performance and longevity, with increased resistance to impact as well as the most severe weather conditions. Because of its supreme durability, VersiGard 90-mil non-reinforced EPDM also reduces maintenance expenses and overall lifecycle costs.

- Unsurpassed protection and weatherability with a 90-mil thickness
- Increased resistance to puncture and hail damage
- Reduced maintenance and lifecycle costs with long-term performance
- 30-year warranty coverage available with a fully adhered system

TRUEROOF COST

Versico's TrueRoof Cost program can provide a detailed report showing total lifecycle savings for the life span of the roof. A TrueRoof Cost Report can:

- Show how a thicker membrane or additional insulation can save money over the lifetime of the roof
- Demonstrate potential energy savings
- Identify assemblies that provide maximum return on investment in specific climates

30-YEAR TOTAL SYSTEM WARRANTY

Versico's top-of-the-line 30-Year Total System Warranty is designed to offer the maximum level of performance by integrating its thickest membrane into the most secure system possible. The 30-Year Warranty provides extensive protection, including coverage of:

- Membrane, insulation, fasteners and terminations
- Accidental puncture
- Hail damage
- Wind damage (up to 100 mph)

With its premium 90-mil non-reinforced EPDM roofing system, coupled with Quick-Applied Tape Seam Technology and 30-year warranty coverage, Versico can provide an easy-to-install roofing system that offers superior strength, durability and long-term performance while significantly reducing labor and material costs for virtually any commercial low-slope roofing system.

IDEAL FOR RE-ROOFING

Premium EPDM systems are ideal for both a recover of an existing roofing system or a tear off and replacement. Premium membranes provide unmatched puncture resistance and warranty durations, both of which are extremely important when dealing with reroofing applications.
