

# ERGONOMIC EQUIPMENT

## SYSTEM ACCESSORIES

### VERSICO'S SECURTAPER

Versico's SecurTAPER, an ergonomic equipment innovation, was designed to provide a means for seaming applications that is efficiency driven, user friendly and quality enhancing. With the SecurTAPER, one crewmember can install 100' of seam tape in one minute. This equipment reduces excessive roofing contractor kneeling and enhances seam tape installation consistency. The SecurTAPER is especially desirable for use on Versico's EPDM Mechanically Attached and Fully Adhered Roofing Systems.

### Features and Benefits

- Ability to apply 3" - or 6" -wide poly-backed seam tapes
- Increases seam tape application productivity by more than 75% versus conventional seam tape application
- Turns a two or three crewmember operation into a one-person task
- Simple to use and master
- No engine parts, no gasoline required
- Eliminates awkward positions

Innovations like the SecurTAPER improves ergonomics, increases roofer productivity and improves seam quality. Versico embraces these technologies and will continue to address workplace challenges.

The old way of applying seam tape is time consuming and may cause injuries due to awkward positions.

A unique guiding mechanism keeps equipment on track.

The SecurTAPER improves productivity by keeping workers on their feet.

A SINGLE SOURCE FOR SINGLE-PLY ROOFING

## VERSICO'S ERGONOMIC EQUIPMENT

Versico's SeamRoller complements an exciting line of ergonomic equipment offerings. The SeamRoller eliminates the tedious task of rolling in seams with 2"-wide hand rollers and allows contractors to be on their feet during the process.

With the SeamRoller, contractors experience both installation and labor savings on EPDM applications. When using this equipment, the rolling task (in the seaming process) that used to take two individuals approximately 8-10 minutes takes one person 2 minutes. The typical installation time saved – 75%.

This roller incorporates a lightweight 6"-wide by 2"-diameter roller and a 62" handle with a 45° bend. The handle bend eases the applicator into an ergonomically stable position, while increasing the amount of force being applied to the seam tape splice.

### Features and Benefits

- Ergonomic design
- Keeps applicators on their feet
- Lightweight, yet durable
- Uses a 6"-wide roller versus conventional 2"
- Increases production
- Cost effective

The SeamRoller's unique handle design ensures maximum efficiency and affords more user comfort.

## VERSICO'S STAND UP MEMBRANE SLITTER

Versico's ergonomically designed Stand Up Membrane Slitter allows you to work more on your feet and less on your hands and knees. The Stand Up Membrane Slitter allows you to cut the membrane either in a straight line or following a curve while remaining standing. This tool was designed to withstand the daily rigors of a full day on the roof.

### Features and Benefits

- Comes fitted with a standard utility knife
- Replacement blades can be purchased at any construction material outlet
- Designed to accommodate most standard utility knives should a replacement knife become necessary
- Care was given when designing the cutting apparatus to prevent the knife from causing accidental punctures while cutting over existing membranes
