Flammability Classification: Not flammable.

Extinguishing Media: In case of fire, use water spray, foam, CO₂ and dry chemical.

Unusual Fire or Explosion Hazards: None. This product is not considered flammable.

Sensitivity to Impact – Not applicable.

Hazardous Combustion Products: Thermal decomposition may produce toxic fumes of carbon monoxide and/or carbon dioxide.

Fire-Fighting Instructions: Fire fighters should wear self-contained breathing apparatus and full protective clothing with a full-face piece operated in the positive pressure demand mode.

Fire-Fighting Equipment: Because fire may produce toxic thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with a full face piece operated in pressure-demand or positive-pressure mode.

Section 6 - Accidental Release Measures

Spill /Leak Procedures:

Small Spills: For minor spill, collect with an absorbent material and dispose of in accordance to governmental regulations.

Large Spills: Contain large spill by building a dike with absorbent material. Collect remaining material and place the material in a container approved for waste disposal.

Containment: For large spills, dike far ahead of liquid spill for later disposal. Do not release into sewers or waterways.

Cleanup:

Regulatory Requirements: Follow applicable OSHA regulations (29 CFR 1910.120).

Section 7 - Handling and Storage

Handling Precautions: Use personal protection recommended in Section 8. Avoid eye, skin and clothing contact. Wash with soap and water before eating, drinking, or smoking. KEEP OUT OF REACH OF CHILDREN. Clean equipment as soon as possible after use.

Storage Requirements: Store in cool, dry place (60-80°F) away from moisture or incompatible materials. Keep container tightly closed when not in use. Do not freeze. Store away from heat, sparks and flame.

Section 8 - Exposure Controls / Personal Protection

	TWA	STEL	TWA	STEL	TWA	STEL	
Amino Silane	N/A	N/A	N/A	N/A	N/A	N/A.	none estab.

Engineering Controls: Do not use in enclosed areas without proper ventilation.

Ventilation: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

Administrative Controls:

Respiratory Protection: Not ordinarily required. Use NIOSH or MSHA approved respirator as appropriate.

Protective Clothing/Equipment: Vinyl or permeation resistant gloves recommend. Wear safety glasses or goggles to avoid eye contact; industrial shoes to protect feet from sealant contact and long sleeves, long trousers to protect skin from sealant contact. Avoid prolonged or repeated contact with skin. Wash thoroughly with soap and water after use.

Safety Stations: Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Contaminated Equipment: Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment.

Comments: Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the toilet, or applying cosmetics.
