

New VersiGard® White Reinforced EPDM
February 17, 2023

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to introduce its new VersiGard White Reinforced EPDM for mechanically attached and adhered roofing systems. VersiGard White Non-Reinforced EPDM has been performing in the field for more than 30 years and provides industry-leading UV weathering performance based on proprietary formulations. Versico has fine-tuned and optimized these formulations to create a high-performance internally reinforced sheet for use on mechanically attached roofs.

Mechanically attached VersiGard White Reinforced EPDM achieves a UL Class A fire rating up to a 1/2" slope over VersiCore® Polyiso and an FM 1-90 uplift rating when fastened at 6" o.c.

UL Class A fire ratings over SecurShield®, SECUROCK®, DensDeck® Prime, and HP Recovery Board are also available for adhered applications.

Two 60-mil roll options are available: a 10' x 100' sheet and a 10' x 100' sheet with 6" Quick-Applied Tape™. Quick-Applied Tape is a high-quality, reliable, and efficient seaming technology and Versico is excited to offer a weld-free option for customers who want a white mechanically attached system.

Ordering Information		
Product Code	Description	Stocking Location
348766	VersiGard White Rein 60-mil 10' x 100'	Carlisle
348781	VersiGard White Rein 60-mil 10' x 100' w/ 6" QAT	Carlisle
