Please Note

Express colors available in shorter lead times for 24 ga., .040" and .050" only. Standard lead times, which may be longer, apply for 22 ga. and .063".

Protective film must be removed immediately. Please note this chart is only a representation of color options. Color matches should only be made with actual samples. Please call or write for actual metal sample(s). Customer is responsible for color selections chosen from printed literature.

We receive metal through multiple vendors. If a specific metal vendor is required for a project, please specify this at the time of order.

Kynar 500® based fluropolymer coating is a high-grade architectural finish offering excellent resistance to degradation caused by nature's elements and airborne contaminants. A limited thirty (30) year finish warranty is available on the prefinished coil-coated steel and aluminum colors shown. Restrictions may apply; consult a sales representative for specific information.

Standard anodized finishes that utilize a continuous coil anodizing process to provide excellent color consistency from piece to piece are available. However, shade variations may occur from coil batch to coil batch. Class I batch anodizing is also available.

As noted, many colors are energy star rated. Emissivity uses ASTM C1371. Reflectivity uses ASTM C1549.
