

# EDGE-TO-EDGE WARRANTY

The importance of a properly designed roof edge system should not be underestimated. On average, the roof edge typically represents only 1% of a building's overall cost. However, improper design and installation of the roof edge can have catastrophic consequences. As one of the most vital parts of a roofing system, it's imperative that coping and fascia are included in your roof system warranty. That is why Versico has created the new "Edge-to-Edge" Total System Warranty.

There are two ways to ensure that edge metal is included in the Edge-to-Edge Total Roof System Warranty:

- Install pre-engineered and factory-fabricated Versico VersiTrim products on any Versico warranted roof system.
- Install shop-fabricated edge metal made from Versico metal flat sheets in compliance with Versico's specifications and details on Versico roof systems with warranties up to 20 years and 80 mph wind speed coverage.

## VersiTrim Pre-Engineered Edge Metal

Versico's VersiTrim perimeter roof edge systems are the first line of defense against wind, ensuring a polished perimeter and long-lasting protection. Versico's unmatched line of roof edge products is available in a range of materials, profiles, and color options to meet any project's needs.

## Shop-Fabricated Edge Metal Using Versico Metal Flat Sheets

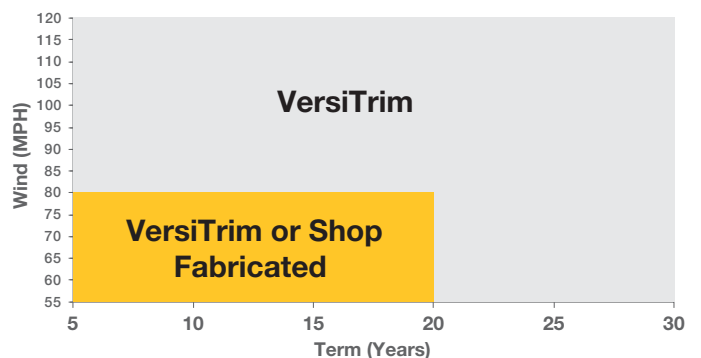

Versico offers a comprehensive lineup of metal flat sheets and coil products in Kynar-coated steel and aluminum. These products can be used to fabricate edge metal to be warranted as part of the Versico roof system warranty.

- Versico metal flat sheets must be used to fabricate fascia and coping.
- Fascia and/or coping must comply with Versico's published specifications and details. Refer to the Metal Edging section of the Versico Specification Supplement (G-10-18).
- Shop-fabricated edge metal will be included in Versico roof system warranties up to 20 years in length and with up to 80 mph wind speed coverage.

## Advantages of VersiTrim Fascia and Coping Systems

- All systems are factory-fabricated and ANSI/SPRI ES-1 tested to meet International Building Code requirements, and many are FM approved.
- Saves time and labor by allowing contractors to spend less time fabricating and more time on the roof, completing jobs.
- Engineered cleats with pre-punched fastening slots facilitate quick, easy, and precise installation.
- Can be warranted up to 30 years under Versico's Total Roofing System Warranty.
- Finish warranties up to 35 years are available for Kynar® 500 and Hylar® 5000 PVDF finishes.
- Available in 30 standard colors; custom finishes and colors are available upon request.
