

**VersiFlex™ PVC/KEE HP Light Gray Polyester-Reinforced Membrane
November 18, 2019**

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to introduce its new Light Gray Polyester-Reinforced PVC, KEE HP, and VersiFleece® membranes and accessories. Manufactured in Greenville, Illinois, Versico's highly reflective Light Gray membranes meet California Title 24 requirements, can contribute to LEED® credits, and can hide dirt accumulation.

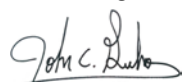

Polyester-reinforced membranes can be adhered or mechanically fastened and offer better tear strength, breaking strength, and puncture resistance than fiberglass-reinforced membranes. Versico's Light Gray Polyester-Reinforced PVC and KEE HP meet or exceed the physical requirements of Type III and Type IV per ASTM D4434 Standard Specification for Polyvinyl Chloride Sheet Roofing.

Versico's Light Gray PVC, KEE HP, and VersiFleece Products
