

**ATAS Metal Flat Sheets**  
**January 11, 2017**

Versico Roofing Systems is pleased to announce the launch of a new distributor metal flat sheet sales program. Versico has collaborated with ATAS International, Inc., a leader in the metal construction industry, to offer a full line of metal flat sheets for use in the shop fabrication of metal edging as well as other discretionary uses.

Metal flat sheets purchased through this program are available in a variety of thicknesses of aluminum (.032, .040, .050, and .063) and metallic coated steel (22- and 24-gauge). A full range of 32 colors are offered in 24-gauge steel (48" x 120" sheets) and .040 aluminum (50" x 120" sheets); many colors are also available in .032, .050, and .063 aluminum and 22-gauge steel. A color chart is available on the Versico website and can be ordered using Versico's online literature and sample order form. Physical metal samples can be ordered from ATAS.

Metal edging fabricated from Versico flat sheets may be eligible for Total Roofing System Warranty coverage (up to 20 years and 55 mph), provided that the edging complies with Versico's specifications and details. PVDF-coated sheets carry a 35-year, non-prorated paint finish warranty. To be eligible for warranty coverage, metal flat sheets must be ordered from Versico. Material ordered directly from ATAS will not be eligible for warranty coverage.

For pricing and availability, please contact your Versico distributor. Please note that material purchased through this program will ship directly from ATAS facilities and may not be combined or shipped with Versico membrane or insulation.

Sincerely,
