

**New 3-Gallon Pails of Primer
January 7, 2019**

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to announce it will begin offering three-gallon pails of its recently reformulated V-150 and Low-VOC EPDM/TPO Primer. The new three-gallon pails can easily accommodate 9"-wide rollers for improved rooftop productivity, especially when applying primer to 6"-wide seams. In addition to labor savings, V-150 and Low-VOC EPDM/TPO Primer offer a number of additional benefits.

Excellent tack – V-150 and Low-VOC EPDM/TPO Primer provide aggressive tack and offer an extended open time.

Resistance to gelling – V-150 and Low-VOC EPDM/TPO Primer are highly resistant to gelling, which is why Versico can now offer these products in three-gallon pails.

Shelf life – Due to their excellent resistance to gelling, V-150 and Low-VOC EPDM/TPO Primer now have a 12-month shelf life.

New 3-Gallon Pails of Primer
